Useful Information

Potential applicants can check proximity by downloading the site list, found in the downloads section of application process on our website.

Regulatory Requirements and Funding Restrictions

Due to regulatory restrictions all projects must:

- Be within 10 miles of any landfill site (as the crow flies).
- Be open to the public for evenings or two days every week, a total of 84 days per year.
- Are in England, Scotland and Wales. (Not strictly a regulatory requirement but an internal CEMEX constraint).

Please refer to our funding restrictions document for further Regulatory Requirements.

We are unable to support projects which:

- Are a condition of any planning permission or other statutory consent or CEMEX contract requirements.
- Are under a term or an agreement made under
 - Section 106 of the Town and Country Planning Act 1990
 - Section 75 of the Town and Country Planning Act (Scotland) 1997
 - Article of the Planning (Northern Ireland) Order 1991
 - Improve or enhance the social, built or natural environment, public space, facility or building for leisure or entertainment.

All projects and applicants must operated with a not-for-profit stance.

If offered a grant

- Funded organisations will be required to sign a standardized contract of terms and conditions, which will require at least one project report.
- Applicants will be required to become an environmental body with the Landfill Communities Fund Regulatory Body, ENTRUST, if offered a grant (this is not required at application stage). This involves a fee of £100, which may under some circumstances be requested in the grant. Projects must also be registered with ENTRUST.
- Any unused grant must be returned to the Fund.
- General publicity is encouraged but all publicity naming the CEMEX Community Fund or bearing its logo must be pre-approved by the Fund.

Wildlife Reserve, Renfrewshire.

CEMEX Community Fund

Strategy for Giving

The CEMEX Community Fund and its predecessors have supported a total of 185 projects with total grants of £10.5 million

About Us

The CEMEX Community Fund is a dedicated grant resource for enabling and assisting communities local to CEMEX quarry and landfill sites to carry out projects which improve or enhance local community facilities and places of interest.

We are able to support a small number of projects with grants ranging from £1,000 to £15,000 for projects which:

- Provide and maintain public parks and amenities when the work protects the social, built and/or natural environment.
- Repair, or restore buildings or structures which are of religious, historical or architectural interest.

We operate under the Landfill Communities Fund, formerly the Landfill Tax Credit Scheme.

Warwickshire Environmental Trust,
Broom Village Hall.

Pleasington Old Hall Butterfly Garden and
Woods, Lancashire Wildlife Trust.

Garden of Rest, All Saints Church,
Wribbenhall, Worcestershire.

Projects Most Likely To Receive Our Support

- Projects which are very close (i.e. within 3 miles) to a CEMEX quarry, landfill or high impacting site.
- Consider the environment in all aspects, for example use of sustainable resources, ecological design.
- Act as Beacons for other projects and applications, such as those which demonstrate innovation and/or inspiration socially or environmentally.
- Those which encourage and develop community relationships with local CEMEX operations.
- Where the grant requested will cover total project costs, (we do however regularly support larger part funded projects, such projects should apply for the element of the project we can fully fund).

Roof restoration at St Mary's Church,
Sawston, Cambridge

Projects Unlikely To Receive Our Support:

Projects which:

- Request retrospective funding
- Are for the purchase of land
- Project extensions
- Repeat requests
- Rolling/ongoing maintenance
- Those without an adequate sustainability plan
- Where the community and other stakeholders have not been included in plans (or the planning process).

On occasion the Fund may support projects which are not close to a CEMEX quarry or landfill, this is rare and is usually on the basis that the project will benefit a large number of visitors, is of national significance to the environment, and/or has high visitor numbers likely to include those from areas where CEMEX operates.
